A solid and dynamic color palette that reflects the values of innovation, energy, and future vision. Each color has been chosen to ensure consistency, accessibility, and recognizability.

Our primary color palette consists of pure black and white. It forms the neutral foundation of the visual system, essential to ensure clarity, structure, and legibility.

This color pair enables a strong and versatile visual hierarchy that adapts across applications, enhancing the impact of the brand's accent colors.
Black and white also symbolize transparency and method—offering a clean backdrop where content can take the lead and data can be communicated with precision.

At the heart of OpenEconomics’ color system lies Bluette: a bright, tech-forward, and authoritative tone that effectively conveys innovation, energy, and future vision. It’s a strong and contemporary hue that maintains personality and clarity across various visual contexts—whether paired with typography, icons, or imagery.

Supporting it, Lime brings a vibrant and electrifying edge: a color that speaks to bold innovation, positive urgency, and proactive energy. Lime reinforces the brand’s more distinctive and dynamic side, expanding the expressive potential of the palette.

Together, Bluette and Lime form a recognizable, coherent, and flexible color combination—capable of adapting to different design languages while staying true to the identity and impact of OpenEconomics.
